

ARK PEST CONTROL

Control of Substances Hazardous to Health (COSHH) Assessment – APC51

Product Name: (Purchased product brand name)

Reference No: Rev 04

INSECTABAN LIQUID

Rev: 10.06.2020

This CoSHH Assessment form is solely for purchased hazardous substances (e.g. Bleach). For the more complex hazardous substances use form FCA01.

Hazards identified on the container or Safety Data Sheet (SDS) (tick appropriate boxes)

										
√		√								

Hazard/Risks Identification:

<i>H302: Harmful if swallowed.</i>
<i>H360D: May damage the unborn child.</i>
<i>H412: Harmful to aquatic life with long lasting effects.</i>
<i>Because of antivitamin K properties of the active ingredient, absorption can inhibit blood coagulation and cause haemorrhagic syndrome.</i>

A brief description of how the substance is to be used:

Hand Applying

Who is likely to be affected by the substance?

Employees	√	Visitors	√
Cleaners	√	Patients / Residents / Service Users / Clients	√
General Public	√	Contractors	√

Existing Controls (Provide a brief description of how the hazards are currently controlled. You may use the MSDS as a guide)

General information - Get medical attention immediately.
 Because of antivitamin K properties of the active ingredient, absorption can inhibit blood coagulation and cause haemorrhagic syndrome. Antidote Vitamin K1 administered by medical/vetinary professionals only. Cases of severe poisoning may require the usual measures like application of blood products or transfusions. Necessity and efficacy have to be assessed by INR. In case of ingestion gastric lavage should be considered in case of significant ingestions only within the first 2 hours. However, the application of activated charcoal and sodium sulphate is always advisable.

Ensure there is suitable ventilation of the area. Where there is insufficient ventilation respiratory protection must be provided. Respiratory protective device with particle filter.

Hand protection - Impermeable protective gloves conforming to EN 374. Nitrile gloves

Eye contact - Safety goggles (conforming to EN166, Field of Use = 5 or equivalent).

Skin Protection - Impermeable protective clothing.

ARK PEST CONTROL

Control of Substances Hazardous to Health (COSHH) Assessment – APC51

Current storage arrangements and the quantity held in stock (*Consider the risk of fire when storing substances. The fire risk must be covered in a separate Fire Risk Assessment*)

Store in a cool, well ventilated area. Keep container tightly closed. Keep away from direct sunlight. Do not store at a temperature above 40 oC. Keep away from food, drink and animal feeding stuffs.

Current Spillage/Release Arrangements. (*You may use the SDS as a guide*)

Mark out the contaminated area with signs and prevent access to unauthorised personnel. If outside do not approach from downwind.

Ensure personal protective equipment is worn – (Impermeable protective gloves conforming to EN 374. Nitrile gloves, Safety goggles (conforming to EN166, Field of Use = 5 or equivalent), Impermeable protective clothing.)

Contain the spillage using bunding. Do not discharge into drains or rivers. If spillage enters drains leading to sewage works inform local water company immediately. If spillage enters rivers or watercourses inform the Environment Agency.

Transfer to a closable, labelled salvage container for disposal by an appropriate method. Clean contaminated floors and objects thoroughly, observing environmental regulations.

Current Disposal Arrangements. (*You may use the SDS as a guide but also consider residual left in the containers*)

Transfer to a suitable container and arrange for collection by specialised disposal company.

Can the substance be removed or replaced by a substance less hazardous? YES / NO (Circle as appropriate)

How often do employees and others come into contact with the substance?

Continual use		Frequent use	√	Minimal use	
---------------	--	--------------	---	-------------	--

Using this information, it is now possible to determine the level of risk from the substance and decide on the controls required to remove or reduce the risks.

Do you consider the current control measures suitable and sufficient? YES / NO (Circle as appropriate)

EMERGENCY ARRANGEMENTS:

Fire Measures: What fire fighting measures are required to extinguish the substance? This information will be indicated on the safety data sheet if applicable.

WATER	FOAM	DRY POWDER	CO2	WET CHEMICAL	NONE
√ <i>(Do not use water jet)</i>	√	√	√		

What methods are used to fire fight without putting yourself at risk? Is suitable PPE required and if so what?

In combustion emits toxic fumes.

Advice for fire-fighters: Wear self-contained breathing apparatus. Wear protective clothing to prevent contact with skin and eyes. Contain the spread of the firefighting media. Do not allow run-off from firefighting to enter drains or water courses.

First Aid Measures: These are the first aid measures required should contact with the substance arise. It identifies each route of entry to the body and indicates what action must be taken should somebody become exposed. This information will be indicated on the safety data sheet.

Route of entry:

First Aid Measures:

Inhalation:	Remove casualty from exposure ensuring one's own safety whilst doing so. Consult a doctor.
Absorption:	
Ingestion:	Wash out mouth with water. Do not induce vomiting. Transfer to hospital as soon as possible.
Injection:	
Skin Contact:	Wash immediately with plenty of soap and water. If available polyethyleneglycol 400, subsequently rinse with water. Consult a doctor
Eye Contact:	Bathe the eye with running water for 15 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Get medical attention promptly if symptoms occur after washing.

ARK PEST CONTROL

Control of Substances Hazardous to Health (COSHH) Assessment – APC51

Are the first aiders aware of the arrangements to deal with this substance in the event of a first aid emergency? **YES** / NO (Circle as appropriate)

Are there arrangements in place to deal with spillages? (eg is there an emergency procedure)?

YES / NO (Circle as appropriate)

If you consider the controls adequate then sign the CoSHH assessment off. If further controls are required then identify them below. This CoSHH assessment must be reviewed at least annually. The CoSHH assessment must also be reviewed if there are any changes in circumstances and following an accident or incident.

Extra controls required to reduce the risks.
