

ARK PEST CONTROL

Control of Substances Hazardous to Health (COSHH) Assessment – APC89

Product Name: *(Purchased product brand name)*

Reference No: V2

Muribrom Block

Rev: 26.01.2018

This COSHH Assessment form is solely for purchased hazardous substances (e.g. Bleach). For the more complex hazardous substances use form FCA01.

Hazards identified on the container or Safety Data Sheet (SDS) (tick appropriate boxes)

√									
---	--	--	--	--	--	--	--	--	--

Hazard/Risks Identification:

H360D May damage the unborn child.
H372 Causes damage to organs through prolonged or repeated exposure.
P201 Obtain special instructions before use. P260 Do not breathe dust/fume/gas/mist/vapours/spray. P264 Wash ... thoroughly after handling. P280 Wear protective gloves/protective clothing/eye protection/face protection P308+P313 IF exposed or concerned: Get medical advice/attention. P314 Get medical advice/attention if you feel unwell. P501 Dispose of contents/container in accordance with the legislation in force.

A brief description of how the substance is to be used:

Indoors and outdoors (around buildings within tamper resistant bait stations) and in sewers. Used for Rats and mice.

Who is likely to be affected by the substance?

Employees	√	Visitors	√
Cleaners	√	Patients / Residents / Service Users / Clients	√
General Public	√	Contractors	√

Existing Controls (Provide a brief description of how the hazards are currently controlled. You may use the MSDS as a guide)

Exposure control limits – refer to the MSDS

Provide suitable ventilation. This can be achieved by appropriate local extraction-ventilation and good general extraction system.

Respiratory protection - PE: Particle Filtration Respirator Category III. Manufactured in filter material, covering nose, mouth and chin EN 149

Hand protection –Gloves that provide protection against chemicals Category III CEN Standards: EN 374-1, En 374-2, EN 374-3, EN 420
 PVC (polyvinyl chloride) Penetration time (min): > 480 Material thickness (mm): 0.35
 Gloves must be of the correct size, and adapt to the worker’s hands. They must not be too loose or too tight. Always use with clean, dry hands.

Eye protection - Glasses that provide protection against the impact of particles. Category II. Eye protection against dust and fumes. CEN Standards: EN 165, EN 166, EN 167, EN 168

Skin protection - Category II. Protective clothing should not be tight or too loose so that it does not interfere in a person's movements. CEN Standards: EN 340

ARK PEST CONTROL

Control of Substances Hazardous to Health (COSHH) Assessment – APC89

Current storage arrangements and the quantity held in stock (*Consider the risk of fire when storing substances. The fire risk must be covered in a separate Fire Risk Assessment*)

Wear appropriate personal protective equipment.
 Do not use pressure to empty containers, the containers are not pressure resistant.
 No smoking, eating or drinking in the area where the product is being applied.
 Comply with occupational Health & Safety legislation.
 Store according to local legislation. Comply with the instructions on the label. Store containers between 5°C and 35°C, in a dry and well-ventilated place, away from heat sources and direct sunlight. Keep away from sources of ignition. Keep away from oxidizing agents and from highly acid or alkaline materials. No smoking. The entry of unauthorized persons is forbidden. Once the containers have been opened, they must be carefully closed and placed vertically to avoid spills.
 Storage classification and qualifying quantity in accordance with Annex I to Directive 2012/18/EU (Seveso III):

Current Spillage/Release Arrangements. (*You may use the SDS as a guide*)

Wear appropriate personal protective equipment.
 Avoid contaminating drains, surface water or groundwater, as well as the land.
 The contaminated area must be cleaned immediately using a decontaminant. Pour the decontaminant on the spill and leave it for several days until no further reaction takes place in an open container.

Current Disposal Arrangements. (*You may use the SDS as a guide but also consider residual left in the containers*)

Do not discharge into sewers or water courses. Waste and empty containers must be handled and disposed of in accordance with current local/national legislation.
 Follow Directive 2008/98/EC provisions regarding waste management.

Can the substance be removed or replaced by a substance less hazardous? YES / **NO** (Circle as appropriate)

How often do employees and others come into contact with the substance?

Continual use		Frequent use	√	Minimal use	
---------------	--	--------------	---	-------------	--

Using this information, it is now possible to determine the level of risk from the substance and decide on the controls required to remove or reduce the risks.

Do you consider the current control measures suitable and sufficient? **YES** / NO (Circle as appropriate)

EMERGENCY ARRANGEMENTS:

Fire Measures: What fire fighting measures are required to extinguish the substance? This information will be indicated on the safety data sheet if applicable.

WATER FOG	FOAM	DRY POWDER	CO2	CHEMICAL	NONE
√	√ (alcohol resistant)	√	√		

What methods are used to fire fight without putting yourself at risk? Is suitable PPE required and if so what?

The product does not present any particular fire hazard.
 Do not use direct jets of water. In the presence of electrical voltage, do not use water or foam as extinguishing media.
 The fire may produce thick black smoke. As a result of thermal decomposition, hazardous by-products may be generated: carbon monoxide, carbon dioxide. Exposure to the products of combustion or decomposition may pose a health hazard.
Advice for fire-fighters - Cool any tanks, cisterns or containers near the source of heat or fire with water. Take the direction of the wind into account. Prevent the products used during fire-fighting operations from entering sewers, drains or water courses.
Fire-fighting equipment - Based on the size of the fire, the use of heat resistant garments, SCBA, gloves, goggles or face masks, and boots may be required.

ARK PEST CONTROL

Control of Substances Hazardous to Health (COSHH) Assessment – APC89

First Aid Measures: These are the first aid measures required should contact with the substance arise. It identifies each route of entry to the body and indicates what action must be taken should somebody become exposed. This information will be indicated on the safety data sheet.

Route of entry:

First Aid Measures:

<i>General advice:</i>	
<i>Inhalation:</i>	Move the exposed individual to a place where there is fresh air, keep the individual warm and at rest; if breathing becomes irregular or stops, apply CPR
<i>Absorption:</i>	n/a
<i>Ingestion:</i>	If accidentally ingested, seek medical assistance immediately. Keep the person at rest. DO NOT induce vomiting.
<i>Injection:</i>	n/a
<i>Skin Contact:</i>	Remove any contaminated clothing. Wash the skin thoroughly using soap and water or a suitable skin cleaning agent. Do NOT use solvents or thinners.
<i>Eye Contact:</i>	Remove contact lenses, if present and easy to do. Rinse eyes abundantly with clean, fresh water for at least 10 minutes while pulling the eyelids up. Seek medical assistance.

Are the first aiders aware of the arrangements to deal with this substance in the event of a first aid emergency? YES NO (Circle as appropriate)

Are there arrangements in place to deal with spillages? (eg is there an emergency procedure)? YES NO (Circle as appropriate)

If you consider the controls adequate then sign the CoSHH assessment off. If further controls are required then identify them below. This CoSHH assessment must be reviewed at least annually. The CoSHH assessment must also be reviewed if there are any changes in circumstances and following an accident or incident.

Extra controls required to reduce the risks.

None stated.

Identify the persons who are required to implement the extra controls and set a realistic date for completion of these extra controls.

Action to be implemented by:	Target Date:	Completed Date:
